

Claims

1. A reproducing apparatus comprising:

a reproducing section picking up any of signals compressed in a plurality of different compression methods from a recording medium which records said signals compressed in the plurality of different compression methods and record management information denoting each other's association of said signals compressed in the plurality of different compression methods, respectively;

a decoding section decoding said signal picked up from the recording medium; and

a recording section recording reproduction management information including reproduction-interruption information in said reproducing section associated with said record management information onto said recording medium.

2. The reproducing apparatus according to claim 1, wherein said reproduction-interruption information is elapsed time from start of reproduction of said signal.
